I am currently based in St. Louis, MO. I have worked as an engineer in many different capacities. My strengths shine in collaborative environments that require efficient excellence. With a passion for automation, I enjoy pushing the limits of what has been done before while maintaining the value of simple solutions.

Manufacturing Research and Development Engineer

Jan. 2025 - Present

The Boeing Company

Berkeley, MO

- Facilitate the procurement and installation of capital equipment ~ \$10M of manufacturing equipment to improve several fabrication processes.
- Assist with long term site plans and manufacturing development for several programs and buildings
- Manage project budgets and funding, hiring contractors, suppliers, and other internal business units to complete equipment implementation.
- Led over 15 separate initiatives to solve process issues in tube forming, chemical processing, and welding.
- Support shop with technical and equipment to resume manufacturing operations.
- Designed and built two custom solutions to ergonomic issues on shop floor reducing injury risk.

EDUCATION

Washington University in St. Louis

May 2025 – Aug. 2026

Master of Science in Mechanical Engineering (*Emphasis: Dynamics/Mechanical*)

GPA 3.3

Southern Illinois University Edwardsville

Aug. 2021 - May 2024

Bachelor of Science in Mechanical Engineering

GPA 3.5

Minors: Mechatronics and Robotics Engineering, Business Administration, and Mathematics

Dean's List Summer and Fall 2023, Spring 2024; ASME (president), Biomedical Engineering Society

Illinois Central College

Jan. 2020- May 2021

Associate of Science in Engineering

GPA 3.6

PREVIOUS WORK EXPERIENCE

Design Engineer

Oct. 2024 – Jan. 2025

Bastian Solutions (Robotics)

Maryland Heights, MO

- Designed and commissioned robotic material handling cells, electrical and mechanical systems.

Controls Engineer

May 2024 – Oct. 2024

Wiegmann Associates

St. Charles, MO

- Designed, installed, and commissioned HVAC control systems in industrial, and commercial facilities.
- Manage contractors to complete building automation system installs.

Continuous Improvement Engineering Co-Op

May – Dec. 2023

Amsted Rail - Automation

Granite City, IL

Mechanical Engineering Intern

Summer 2022

Purdue University – Veterans to Energy Careers (VTEC)

West Lafayette, IN

SKILLS/SOFTWARE

C++, Python, html, ROS2 (robot operating system), Gazebo, Creo, SolidWorks, Siemens NX, Matlab, AutoCAD, Inventor, Fusion 360, Ariba, EnteliWEB, Visual Studio, GitHub, Arduino IDE, LaTeX

MILITARY SERVICE

Interior Electrician Team Lead

July 2018 – July 2024

Illinois Army National Guard

Recognitions: Advanced Individual Training Honor Graduate, Combat Life Saver Certification, Brigade Commander Challenge Coin
